on the cards of other manufacturers (eg Intel) possible incorrect work
Version of Direct X: 8.0 or higher
HDD: 20 mb free space.
Description:
Goal - a classic: a loss of identical characters in one or more gaming lines
left to right. Amount BET, you lose for each spin (spin the reels) depends on
the number of selected lines (from 1 to 9) and the rates for each of them (from 1 to MAXBET).

The game is based on the actual math, but will still play a little bit distinctive from the real: the game does not keep statistics, respectively, after turning off the game starts from scratch because it will be difficult to withdraw large sums.
Management:
Cl. 5.1 selection of lines
Cl. F6 rate
Cl. F8 MAXBET
INFO (F1)
F5 = add credits, ENTER = START, A = Autoplay, Esc = exit.
